Chapter 12 Forces And Motion - Teacher Worksheets When the forces on an object are balanced, the net force is zero and there is no change in the object's motion. When an unbalanced force acts on an object, the object accelerates. There are four main types of friction: static friction, sliding friction, rolling friction, and fluid friction. Chapter 12 Forces and Motion The state of motion of an object does not change as long as the net force acting on the object is zero. Thus, an object at rest remains at rest, and an object in motion remains in motion with the same speed and direction unless an unbalanced force acts. This law of motion is sometimes called the law of inertia. Chapter 12: Forces and Motion Flashcards | Quizlet an object at rest stays at rest, and an object in motion stays in motion UNLESS ACTED UPON by an unbalanced force.
