HEAD PACKAGES for 1999-2017 88-103 Harley Twin cams TDG Level 1+ CNC Headwork \$650 Cylinder Heads Those Dyno Guys Porting cylinder heads generally refers to the process of enlarging the intake and exhaust ports of an engines cylinder heads. Porting is usually done to increase airflow and horsepower at high RPM. Heads with smaller ports - unported - usually provide better low-end torque than ported heads. Still, there are some porting procedures that can be performed, without significantly enlarging the ports, that will result in better low-end torque. How to Increase Low End Torque by Porting Heads | It Still ... In general, the most critical areas when porting a cylinder head are those which pass the most air at the highest speed and for the longest duration. Since the highest speed and longest duration airflow within the port is at or near the valve seat, optimizing airflow in this area is especially important. Cylinder Head Porting: The Art & Science Of Improved ... Level 'C' CNC

cylinder head porting. Available for both air cooled and twin cooled H-D models, the Fuel Moto Level 'C' CNC cylinder head was developed for those looking for maximum horsepower in 103, 107, & 117" builds.
