Neuroeconomia Neuroeconomics is an interdisciplinary field that seeks to explain human decision making, the ability to process multiple alternatives and to follow a course of action. It studies how economic behavior can shape our understanding of the brain, and how neuroscientific discoveries can constrain and guide models of economics.. It combines research from neuroscience, experimental and behavioral ... Neuroeconomics - Wikipedia Neuroeconomics attempts to connect economics, psychology, and neuroscience to understand economic decision-making better. The fundamentals of economic theory were built under the assumption that

... Neuroeconomics - Investopedia The new field of neuroeconomics looks at how economic decision-making actually happens inside the brain. Jonathan Cohen, co-director of the Princeton Neuroscience Institute at Princeton University, describes insights that are emerging from the collaborative work of neuroscientists, psychologists, and economists.
