- So it sounds like it's some sort of combination effect from the fact that light travels faster than sound, and that you, Lionel, are the one making the sound. QotW: Do we process sound or light faster? | Questions ... Sound is based on vibrations of air molecules as a moving compression wave. Light (and hence color) is based on an electromagnetic wave. While "frequency" is a measure commonly used for both compression and electromagnetic waves, the two types of waves have substantial differences. The Color of Sound - Pitch-to-Color Calculator The Philae Temple Sound and Light Show is very popular with tourists because it combines the fascination of an historical temple with modern entertainment.
